Montage Rakable All Terrain Ornamental Fence

MONTAGE®
by AMERISTAR®

The ATF® (All Terrain Fence) panel design enables the maximum bias for all Montage™ styles.

It is the only welded steel fence with the capability to follow slopes and severe grade changes.

**Follows Grades
Up To 30" Rise In 8' Run
Without Gaps**

Genesis

3 rail with exposed top and bottom pickets.

Pickets	5/8" Square x 18 Ga.
Rails	.0790" x 0.075" Top 1.235" x 0.075" Sides
Posts	2" Square x 16 Ga.
Coating	E-Coat 20 Year Warranty
Construction	ProFusion Welded

ProFusion Welding

Montage® fence panels are fabricated using a revolutionary ProFusion process that combines fusion and laser technology to automatically weld strong, virtually invisible, structural connections without unsightly or insecure fasteners.

Options:

Add Corona rings to both Majestic & Genesis.

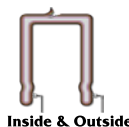

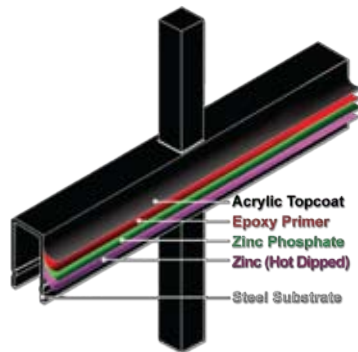

Add Quad-flares to Genesis.

E-COAT

Montage® panels are subjected to a thorough cleaning and zinc phosphate pretreatment and then, in a state-of-the-art E-Coat system, are completely submerged twice, first in a moisture-resistant epoxy and secondly in a weather-resistant acrylic, to ensure protection over all exposed surfaces.

Non-Sag Gates

Montage® gates, both single and double swing, are built with heavy-duty uprights and welded at all intersections. This means Montage® gates won't sag.
